Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

1. Applicant's election without traverse of Group II in Paper No. 8 is acknowledged.

2. Claims 78-80 are withdrawn from further consideration pursuant to 37 CFR

1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 8.

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 81-95 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

It is unclear how the layers are alternated from claim 81, rendering claims 81-95 indefinite. Are there two or three layers?

Claim 82 is indefinite because the metal in 'carbon containing metal', lacks clear antecedent basis. Plus it is unclear what 'hard subgroup metals' are. Does the applicant mean refractory?

Claims 84-85 are indefinite, since it is unclear what 'type' means.

In claims 91 & 92, it is unclear whether there are three alternating layers or two.

In claim 94, the limitation could not be understood. How can, for example, boron be contained in the carbon layer, and not be simultaneously present with carbon, rendering the claim indefinite.

Art Unit: 1775

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in-

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or

(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

6. Claims 81-95 are rejected under 35 U.S.C. 102(b) as being anticipated by Keem et al (4,619,865).

As best construed by the language of the claims, Keem et al anticipates the invention. Keem et al discloses alternating layers that may be made of the claim materials within the claimed thickness.

7. Until the language of the claims is clearer no more art has been applied. The art made of record by the examiner discloses various alternating layers, that examiner feels is relevant.
